

Biomedical Informatics

Ph.D. Training Program at the University of Colorado

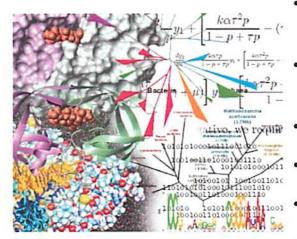

Now accepting applications for

NIH funded Predoctoral Fellowships

The Colorado Biomedical Informatics Training Program is home to nationally recognized faculty working in the areas of:

- Clinical Research Informatics
- Next Generation
 Sequence Analysis
- Molecular Evolution
- Genomics
- Visual Analytics
- Network Analysis
- Biomedical Ontology

- Translational Bioinformatics
- Computational Pharmacology
- **Text Mining**
- Metagenomics
- Microarray Analysis
- Natural Language
 Processing

For more information, visit http://compbio.ucdenver.edu

Qualifications: Advanced education or experience in computer science or allied field, and some knowledge of contemporary molecular biology.

Salary: Full stipend, tuition & fees, and Health & Dental Insurance

To Apply: 1) Email compbio@ucdenver.edu stating intent to apply.

- Complete the University of Colorado Anschutz Medical Campus, Doctoral Student online application at www.ucdenver.edu/admissions
- 3) Select Computational Bioscience in application dropdown.
